    - D. His best friend, Mateo.
    - E. His English teacher.
- 

## Item 4: Reading

**Read the text, then answer the question.**

The Solar System is a fascinating place. At the center, there is a big, hot star called the Sun. Eight planets travel around it. Earth is the third planet from the Sun and it is the only one with liquid water and life. Some planets, like Jupiter, are very big and made of gas. Other planets, like Mars, are rocky and red. Scientists use powerful telescopes to study the stars and planets from Earth.

**Answer the questions:**

1. Which planet is the only one known to have liquid water and life?
  - A. Mars
  - B. Jupiter
  - C. Saturn
  - D. Earth
  - E. Venus
2. What do scientists use to study the stars and planets?
  - A. Microscopes
  - B. Binoculars
  - C. Cameras
  - D. Computers
  - E. Telescopes
